FOOD EMBARGO

Is Asked of President Wilson by Mayor James Curly of the City of Boston.

(BY ASSOCIATED PRESS) BOSTON, Nov. 11.—Mayor James M. Curly sent a letter to President Wilson today asking him to convene Congress and submit a recommendation that a law be enacted putting an embargo on food products, as a step toward reducing the cost of living. The mayor included in his letter a table giving the increase in food prices within the last year, which he said, showed that wages would have had to advance 100 per cent in order to keep pace with the rise of the cost of the necessities of life. Mayor Curly asserted that an embargo would destroy speculative combinations and "contractual obligations with warring powers."

CAR EXCHANGE

Is Proposed in Order to Bring Relief of the Coal Shortage in Some Sections.

(BY ASSOCIATED PRESS) LOUISVILLE, Ky., Nov. 11.—Immediate relief of the coal shortage in certain sections of the country is promised by proposals approved late today by Commissioner C. C. McChord.

The proposals emanate from railroad representatives present here at the hearings in connection with an investigation by the Interstate Commerce Commission on the exchange and return of freight cars by railroads.

It is proposed that every railroad in the country begin at once the return of all foreign coal cars in its possession, as fast as they are unloaded. If there is no load on them going in the general direction of their home lines, they are to be returned empty.

Coal carrying roads have promised that as soon as a fair proportion of missing equipment is returned they will raise embargoes which have been placed upon shipment on their cars to sections which are now suffering from a scarcity of fuel.

MISUSE OF CARS

Is Charged by Commissioner of a Large Coal Exchange in the State of Ohio.

(BY ASSOCIATED PRESS) COLUMBUS, O., Nov. 11.—Walter D. McKinney, commissioner of a large coal exchange in Ohio, today petitioned the Interstate Commerce Commission to investigate the misuse of cars to other lines in Ohio, believed to be responsible for a coal car shortage in the state. The petition is based on the claim that roads outside of Ohio are holding up cars, which, if returned to the state would relieve the car shortage.

An Inexpensive Air-Cooling System

FOR MOVING PICTURE THEATRES, CAFES, RESTAURANTS, DANCING ACADEMIES, THEATRES, AND ALL PLACES OF PUBLIC ASSEMBLAGE.

The practice of equipping places of public assemblage with air cooling and refrigerating devices during the summer months has been followed for several years in the larger European Cities. The American people have been slow to adopt this method of providing for the comfort of their patrons. This attitude has been largely due to the excessive cost of installing and maintaining the present complicated refrigerating or electrical mechanisms which are not adopted to the requirements of the smaller enterprises.

THE AMERICAN AIR COOLING CORPORATION organized under the laws of NEW YORK STATE WITH A CAPITAL OF \$150,000.00, has purchased the patent rights for the manufacture of a highly efficient and comparatively inexpensive air cooling system from a young inventor. The corporation has retained the services of the inventor who will have entire supervision of the manufacturing operations of the company.

THE AMERICAN AIR COOLING SYSTEM is based on a simple law of physics. The mechanical equipment is light, portable and comparatively inexpensive to install and maintain. It will keep the temperature in every part of a room at the same degree of coolness, whereas the present popular and comparatively expensive electric fan equipment provides relief only to those within a radius of the draft created by the fan. ITS COST WILL PLACE IT WITHIN REACH OF THOUSANDS OF SMALL CAFES, CLUBS, RESTAURANTS, BARBER SHOPS, HOTELS, THEATRES, DANCING ACADEMIES, AND OTHER PLACES OF AMUSEMENT WHOSE BUSINESS HAS HITHERTO ALWAYS FALLEN AWAY DURING THE HEATED TERM. When these establishments are equipped with the American System, their patrons will find a greater degree of comfort there than in their own houses, this condition will inevitably result in a large increase in the business of the proprietors for the summer months.

THE DIRECTORS OF THIS COMPANY HAVE AUTHORIZED THE SALE OF TWO THOUSAND SHARES OF ITS TREASURY CAPITAL STOCK AT THE NOMINAL PRICE OF \$2.50 PER SHARE (PAR VALUE \$5.00 PER SHARE.) THE PROCEEDS, (\$5,000) realized from the sale of this stock will be used for securing a small manufacturing plant, the purchase of materials and the employment of labor necessary for the production of the first few machines.

THE COMPANY HAS ASSURANCE OF CONTRACTS for the installation of several machines when they are in a position to finance their manufacture; there will be no further stock sold at the above price or by these methods when sufficient funds have been secured to install these contracts.

It is the intention of the management to have the capital stock of the company listed on the New York curb stock exchange when they have the several installations mentioned above, in full operation. This will afford a ready market for the purchase and sale of the company's securities.

The large field for the sale of the company's product and its low cost of manufacture insures possibilities of large earnings when the plant and other facilities necessary to turn out the machines in quantities, are secured.

AFTER INVESTIGATION, PERMISSION GRANTED BY J. S. DARST, STATE AUDITOR, TO SELL STOCK IN THIS CORPORATION IN WEST VIRGINIA.

APPLICATIONS FOR THE TREASURY STOCK OF THE COMPANY MAY BE MADE TO
